

Thank you for purchasing one of my Lock 'n' Roll cable storage units.
I use these myself for both storing my own camping/caravan cables as well as my music cables being a musician.
I invented this storage system. I am proud to say that they are manufactured here in the UK.... Not China!! :)

Lock 'n' Roll

INSTRUCTIONS FOR USE

STORING YOUR CABLE

Feed your cable through one of the holes on the RED side of the storage unit (from the inside out) and clip the end of your cable on one of the four cable clips.

Squeeze the red hub tightly' to stop Lock 'n' Roll from spinning and wind your cable onto the storage unit.

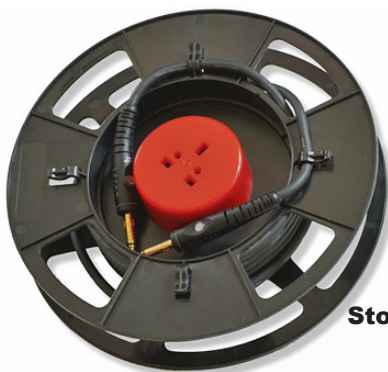

Clip the other end of your cable onto one of the three remaining cable clips.

REMOVING YOUR CABLE

Un-clip the end of your cable. Then holding the RED hub (without squeezing tightly) pull the cable off Lock 'n' Roll.

The red hub will allow the black part of the unit to spin while you unwind your cable off the storage unit.

Job Done.

Stores Music Cables

Stores most Cables
and power leads

NOTE: Lock 'n' Roll can store up to 25 Metres of cable depending on the thickness of your cable.
It's also great for storing your Xmas Lights & Music Cables etc
